

PSEUDOTSUGA MENZIESII

Douglas Fir

The Douglas Fir is an evergreen conifer, but is not a true fir. The branches are arranged spirally, ascending at the top and drooping at the bottom.

This tree can grow from 80 to 200 feet tall.

Seed Sources: 053, 251, 252, 262, 452, PR, VI, Genetically Improved.
