

# ABIES CONCOLOR

## White Fir

The White Fir is an evergreen conifer with long, silvery-blue needles. It is a very adaptable fir, as it can withstand heat, drought and cold. This tree is a good fit for the east and Midwest parts of the United States. The White Fir will grow 60 to 100 feet tall, and can live up to 300 years. Comes from the 771 seed zone.
